

Encyclopædia Iranica

3000 Years in the Making

***You are Cordially Invited to
An Exclusive Dinner to Support Iranian Cultural Heritage***

The *Encyclopaedia Iranica* is a multi-disciplinary reference work and research tool designed to record the facts of Iranian history and civilization. It focuses on the land, life, culture and history of all Iranian peoples and their interaction with other societies.

From the biographies of notable men and women in every field of endeavor to descriptions of all Iranian cities and monuments (ancient and modern), from oil installations to major banks, from Zoroastrian scriptures to Jewish shrines and Islamic rituals, from Persian classics to modern novels, from Iranian flora and fauna to Persian music and folklore, from philosophy and mysticism to calligraphy and architecture, all aspects of life in Iranian and related cultural areas are studied and described in articles presenting the current state of research in their texts and appended bibliographies.

To inform a worldwide readership of scholars and general readers and to stimulate further research in different disciplines have been the twin primary and continuing concerns of the project from the outset.

Guests of Honor

Dr. Firouz Naderi

*Associate Director
Project Formulation &
Strategy
NASA Jet Propulsion
Laboratory*

Dr. Ehsan Yarshater

*Editor
Encyclopaedia Iranica*

Dr. Reza Moridi
